

TubeTrack UK — Product Design Specification (PDS)

This companion document expands the implementation brief with UX, interaction and visual guidance.

Vision

- Apple Maps × Flighty × Citymapper inspiration
- Map-first experience
- Live status always visible
- Section-level disruption highlighting
- Liquid Glass design language

Deliverables

1. Schematic Map
2. Real World Map
3. Engineering Works
4. About
5. Reusable design system
6. Animation guide
7. Component catalogue
8. Accessibility guidance
9. Network Health concept

Schematic Map

- Harry Beck inspired vector rendering.
- Central London default viewport.
- Floating glass status panel.
- Issue Highlight mode greys unaffected network.
- Live train overlay with line filters.

Real World Map

- MapKit base.
- Tube geometry overlays.
- Same interactions as schematic map.

Engineering Works

Chronological glass cards grouped by weekend with coloured line accents.

Design System

- GlassPanel
- GlassButton
- GlassChip
- StatusCard
- WorksCard
- LiveTrainMarker

Animation

- Spring for panels.
- Ease-in-out for issue highlighting.
- Smooth interpolation for trains.

Network Health

Circular summary showing overall Tube health and disruption count.
